Deadline nears,
offers advice
all taxpayers

TODAY (AP) — The Internal Revenue Service, often viewed as a queue every last dime, offered some saving money Thursday for an onslaught of return filers.

People who can't complete their returns by midnight Friday should file Form 4885. That requires them to estimate and pay their taxes now but gives them until Aug. 15 to file the final return.

People who can't complete their returns by midnight Friday should file Form 4885. That requires them to estimate and pay their taxes now but gives them until Aug. 15 to file the final return.

WASHINGTON (AP) — Kenneth L. Adelman was confirmed, 57-42, as the nation's arms control director on Thursday after a long Senate fight over President Reagan's strategic policies as well as the young ambassador's competence and credibility.

Reagan pronounced himself "deeply gratified" and declared "It's my earnest hope that this positive step

will mark the beginning of a new bipartisan consensus on the vital issue of nuclear arms reductions."

The president, at an informal news conference, said Adelman would head the newly created National Security Council Arms Control Directorate. And "If we are met with reciprocal seriousness of purpose from the Soviet Union, 1983 can be a year of historic importance in

securing a more solid and stable peace through arms reductions," Reagan said.

Adelman, in New York City, said he would contact all members of the Senate Foreign Relations Committee,

which opposed his confirmation — in an effort to meet "with each one next week to seek their continued counsel on arms control issues." He

said that when the panel first began examining him, "I believed in an energetic bipartisan congressional role in foreign policy, and I still do — more so than ever."

Only Sen. Bob Packwood, who was in his home state of Oregon attending a Republican conference, did not vote on the nomination. Forty-nine Republicans and 8 Democrats supported Adelman; 38 Democrats and 4 Republicans — Charles M. Mathias of Maryland, Max Baucus of Montana, and Sage Cartwright of Washington — voted against him.

In Moscow, the official news agency Tass said the outcome was the result of "Herculean arm twisting" by the White House. It called Adelman an "outright hawk and opponent of measures to curb the arms race."

Chief Strategic Arms Negotiator Edward Rowny of ADP Radio: "I'm happy. Let's get down to business. Adelman and I have known each other . . . and have a mutual respect for each other. We can get together and move forward."

3 Democrats against Adelman

Three Democratic senators with presidential ambitions spoke against Adelman in the closing hours of a three-day debate over the nomination that capped three months of deliberations in committee rooms and corridors.

Senate Democratic Whip Alan Cranston of California argued that Adelman's confirmation "would be a betrayal of the hopes of tens of millions of Americans for swift progress toward a mutual, balanced, verifiable end to the SALT II nuclear arms race."

Put best team forward

Sen. John Glenn, D-Ohio, said, "We should be putting forward . . . not someone who can just get by, but the very finest, negotiating team we can possibly assemble. Unless we put forward our best effort, our best team, this may be our last hope for mankind."

Sen. Gary Hart, D-Colo., said Adelman "appears to be more dedicated to an arms buildup than to reducing the hazards of unrestricted competition." His nomination by Reagan, said Hart, "signifies a serious lack of concern for the efficacy of arms control negotiation."

Sen. Edward M. Hollings, D-S.C., did not take a stand in the four-hour debate but voted against the nomination.

Cranston and Hart are announced candidates for the 1984 Democratic presidential nomination. Glenn and Hollings are expected to enter the race shortly.

Sen. Charles H. Percy, R-Ill., chairman of the Senate Foreign Relations Committee, which led the fight for the nomination, saying Adelman's confirmation would "vigorously move the Reagan administration toward arms control agreements that can win the approval of the Senate."

Vote not needed

Vice President George Bush, who as president of the Senate was empowered to cast a tie-breaking vote, presided over the climactic roll call but his vote was not needed to assure confirmation.

Trial is spice of life for injured student

By HOLLY ARMSTRONG
Sports reporter

A tragedy occurred amid the gala opening of the new Cougar Stadium on Sept. 25, 1982.

Robert Blair, a junior from Provo majoring in university studies, was working as a ticket-taker at the new stadium when he was injured by a large metal gate that fell on him after two and a half months of capitalization and five "pretty major surgeries." Blair is recovering and "getting stronger every day."

The accident occurred when Blair and other ticket-takers were closing the large gate after the game crowd had passed inside. When the ticket-takers ran into the gate, it gained too much momentum. Instead of stopping when it was supposed to, the gate jumped out of the track and kept rolling.

The stopping mechanism that was designed for the stadium gates was inadequate, according to Hal Vick, general counsel for BYU. However, on the gate that injured Blair, even the inadequate device worked.

Blair suffered multiple injuries that included nerve damage, a crushed pelvis and possible spinal damage. At the time of the accident, doctors speculated that Blair might never walk again.

Blair goes to physical therapy three times a week, attends an adaptive physical education class and walks with a cane for up to 200 yards before having to sit down to rest. He is registered for a religion

class and hopes to be back in school full-time next fall.

Blair's father, Dr. Robert Blair, a professor of linguistics, said: "He's handled the situation just marvelously. He's never despondent. He smiles and has a rosy attitude about things."

The nerves in the pelvic and hip area damaged by the accident are the ones that control the legs, the elder Blair said. "If the nerve damage is not too severe, the nerves could grow back and he'll be very near normal."

All of Blair's medical expenses have been paid by BYU, Blair senior said. "We've been working very closely with the university."

Vick said the university will probably not be liable beyond workman's compensation, which has paid the medical bills, because "we didn't design the gate. We just asked someone to build the stadium for us."

The Blairs have hired a Salt Lake City attorney, Visick said, and the case will eventually be settled out of court between architects and engineers of the stadium and the designers and fabricators of the gate. "It will probably be a substantial settlement."

The events of the last eight months have changed Blair's outlook on his future and on his life, he said. "I had a minor in recreation, and I guess I'll have to change that, and there are some classes I can't take."

His attitude about life? "Life is a little more precious when you have to fight for it."

Adelman gains control, appointed to arms post

BYU will have its largest number of graduates, 4,055, for next week's 107th commencement. The number represents a 4.1-percent increase

over the number of graduates last year. Graduates this year range in age from an 18-year-old woman to a 68-year woman.

4,055 prepare to graduate from Y

By CAROL JENCKS
Staff Writer

This year's commencement exercises will have the largest number of graduates in the history of the university, said Erlend Petersen, assistant dean of admissions and records.

Mortimer J. Adler, writer and philosopher, will speak at the 107th commencement services Friday in the

Marriott Center at 9:30 a.m. The Mormon Tabernacle choir will sing.

Graduates can pick up their caps and gowns at the Alumni House from 8 a.m. to 5 p.m. Tuesday through Thursday.

The number of graduates finishing this April is 2,722; the number who finished in December is 1,283, Petersen said.

He said the total, 4,055, is the largest number in BYU's history. It is a 4.1 percent increase from last year.

The College of Family, Home, and Social Sciences has the most graduates, with about 17 percent of the graduating class, Petersen said.

He said 84 will get associate degrees for December and 166 for April; 930 will receive bachelor's degrees for

December and 2,050 for April; 218 will get master's degrees for December and 411 for April; and 51 will receive doctorates for December and 145 for April.

About 62 percent of the graduates are males and 38 percent are females, he said.

The oldest graduate this year is Melba Jensen Neese, 68, from Provo, who will receive a bachelors in history. The youngest is Denise Woodbury, 18, from California, receiving her bachelors in business management.

According to records that have been kept since 1979, Woodbury is the longest-tenured student to graduate from BYU.

Three sets of twins will be graduating, Petersen said, and, coincidentally, each pair has the same major.

Those twins are Verla and Verlene Nichols from Shoshone, Idaho, graduating with bachelor's degrees in animal science; Martha and Michael Whilman from Moab, Ariz., receiving their bachelor's degree in civil engineering; and Lisa Stadtmueller Clark and Lori Stadtmueller Robinson from Etna, Wyo., getting bachelors in elementary education.

The Indian chief Sitting Bull has a descendant, Charlie Stewart, who will receive a master's degree.

"You have to build bridges to others."

— "M"

Some local divorcees feel this problem is a lack of education about divorce. "Education is the only way to gain some understanding," said "M," a local divorcee.

However, divorcees need to take an active part in building friendships. "You have to build bridges to others," she added.

Part of educating others about the nature of divorce is to dispel the myths that divorce only occurs when one partner has been unfaithful or that divorce is easier than working at the marriage.

"Nothing about me was right to him. People just

don't understand the mental torment of a bad marriage," said L., a BYU student.

M. added: "It is very difficult. You go through a period of bargaining with the Lord. You'll promise anything if it will just work."

This "bargaining" is especially true with those who were married in an LDS temple. "Temple marriage is a very special thing. You're giving a lot of yourself to work it out," said Jane Beurling, a divorcee from Orem who has remarried and does not belong to the group.

She feels, however, that divorce is the right answer in some cases. "For myself, my adjusting to divorce came as a direct result of the fact that I felt the decision was accepted of the Lord," she said.

Wright said a key factor in adjustment is "staying close to the Lord and your church leaders."

Divorce can bring loneliness that, coupled with an often-present sense of failure, causes low self-esteem. "Divorce undermines your self-esteem no matter how strong you felt you were before. You need someone to say you're OK," Wright said.

Divorcees need a support system to work through the pain. There is a loss and they need to grieve that loss," Wright said.

To build self-esteem, Wright said, the group tries to focus on realizing the strengths within each individual.

In addition to realizing their strengths, group members advised other divorcees to make such changes in their lives as getting more education, starting a new hobby and moving into a singles' world.

Along with the previous ideas, the group agreed that divorcees must not concentrate on the past. This bit of advice was the hardest to follow for Wright. "At first I thought a lot about the good times. Those two years were the happiest of my life and nothing compares. I still think the world of my wife," she said.

However, he admonished divorcees to start directing their thoughts to other subjects by putting away pictures and other mementos.

Although the group members have suffered a painful experience, they all agreed they would like to marry again someday. "I'd have to approach very cautiously," Wright said.

He added that it is a mistake to jump into another marriage right away.

In agreeing with this statement, group members also advised couples about preparing for marriage. "Don't make it just a fun-and-games relationship. Take time to talk and share feelings," M. said.

Beurling said two criteria for choosing a mate are spiritual confirmation and making your partner your best friend.

She also advised people to become the kind of person they would like to attract. "Those are the people I get married for only for the physical attraction."

Anderson, who married soon after graduating from high school, said: "I wish I'd taken time to know me. I wish I could have had more education and been more prepared."

Education prepares people for other problems that occur in marriage. "There's the three D's; death, divorce and disability," L. said.

NEWS IN REVIEW

INTERNATIONAL

MOSCOW — Soviet officials said in an interview with The Associated Press on Friday that the proposed freeze on U.S. and Soviet nuclear weapons would create the "appropriate atmosphere" for arms reduction talks.

The interview also revealed the Kremlin has not closed the door to compromise in negotiations on limiting "Euromissiles."

NATIONAL

CALIFORNIA — Astronauts Paul Weitz, Karol J. Bobko, Jerry Marenco and Donald Peterson flew America's second space freighter from a 165-mile high orbit to a smooth touchdown on Saturday on the same runway used by the shuttle Columbia last year, Edwards Air Force Base.

This flight that took the four astronauts around the world 80 times was "incredibly routine," according to Lt. Gen. James A. Abrahamson, associate NASA administrator. For most of the trip, many more milestones than were made in the Columbia flights last year.

NEW ORLEANS — Waters of the Pearl River flowed 15 feet deep through a suburb of New Orleans, but the worst appears over in the Dixie floods that have displaced more than 52,000 people and left \$25 million in damage.

The Pearl reached a record level in Slidell, La.,

northeast of New Orleans, one of the cities worst affected by the flooding that began last week with as much as 20 inches of rain in parts of the Deep South.

SALT LAKE CITY — Ronald LeMayne Kelly silenced his defense lawyers when he was convicted Wednesday of first-degree murder, and asked 3rd District Judge Peter F. Leary to let him die for murdering an 18-year-old Salt Lake City woman last year.

"Mr. Biggs (Kelly's lawyer) wants to go ahead with the defense, but I don't want to do that," Kelly said. "I asked the judge to silence the defense at this point. I want the death penalty."

Kelly added that he didn't want to "do life in prison" because he didn't think it would do any good. "I don't think I could appreciate life after 10 or 20 years in prison," he said.

PROVO — Six BYU students and a University of Utah student were arrested Monday night by the University Police in connection with marijuanna distribution. \$4,800 worth of cocaine, marijuanna, mushrooms, peyote and speed.

"The arrests resulted from an extensive investigation since the middle of January," University Police chief Robert Kelshaw said.

Six of the students arrested are being held in Utah County Jail pending prosecution.

Cuban nuclear missiles not needed to retaliate

MOSCOW (AP) — The Soviet Union has "no need" to put nuclear missiles in Cuba in retaliation for U.S. deployment of new medium-range rockets in Europe later this year, a top Soviet general says.

It was the clearest signal yet from the Soviets that Cuba does not figure in their threat to retaliate for the planned "Euromissiles" deployment.

The comments were made by Maj. Gen. Yuri V. Lebedev, a military adviser to Soviet arms-control negotiators, in an interview with The Associated Press.

Kremlin officials have warned repeatedly they will put the United States in an "analogous position" if the American missiles are stationed in Western Europe within a few minutes' striking distance of Soviet territory.

These statements raised speculation in the United States that the Soviets were considering deploying mid-range rockets in Cuba.

Lebedev, dismissing that possibility, said one of the retaliatory options available to Soviet leaders would simply be expanding their own intermediate-range nuclear forces in Europe.

"It's enough to deploy new systems in Soviet territory," he said.

Would missiles be placed in Soviet-allied Cuba? he was asked.

"There is no need to do it and I have underlined that already," he responded.

Nuclear showdown

In 1962 the Soviets tried to install missiles in Cuba but pulled them back in a nuclear showdown with the United States.

The 55-year-old Lebedev, ruddy, round-faced

and black-haired, was interviewed through an interpreter at a Foreign Ministry press center.

The interview was one of several by government, military and academic figures who have been unusually accessible to visiting American reporters at a time when the Soviet Union and the United States are engaged in intense political and diplomatic negotiations over nuclear arms in Europe.

NATO decision

The NATO decision calls for installation of the missiles unless the United States and Soviet Union first negotiate an agreement reducing medium-range nuclear weapons in Europe. Those negotiations, now 18 months old, appear deadlocked.

Lebedev was asked whether the Soviet leadership means "when" it threatens to order the United States in an "analogous position" if the new missiles are deployed.

The general smiled, turning his eyeglasses in his hand.

"Do you have any doubts we will do it?" he asked.

Pressed on whether the threat meant missiles would be placed within close range of the United States, he replied:

"First of all, you have to know the general trend in Soviet policy; that not a single nuclear system is deployed anywhere else but in Soviet territory."

"And now we can say technological progress has brought us to the point where we don't have to have Soviet weapons within 1,000 kilometers (620 miles) of U.S. territory."

Alternative 'reactions'

He said there were numerous alternative "reactions." Asked whether one might be expansion of the advanced triple-warhead SS-20 force, Lebedev said, "I'm not sure about that."

He cut off discussion of the options, and said later, "I cannot predict, but I still believe there will be good will on the part of the United States... not to deploy the new systems."

Water sabotages warning system

NEW ORLEANS (AP) — A flooded basement and the failure of a \$2 fuse crippled the long-distance telecommunications system of New Orleans for 10 hours last week and severed its link with a nuclear attack warning system.

The breakdown demonstrated the vulnerability of centralized telephone systems in 90 U.S. cities where similar computer switching machines sit in guarded, windowless buildings, according to AT&T officials.

The core of the long-distance telephone system — a computer carrying thousands of circuits, including priority government lines — has survived floods, hurricanes, tornadoes and blackouts across the country.

But when 11 inches of rain brought widespread flooding to Louisiana, the system failed.

"I've never been through a set of circumstances like that and I thought I'd seen everything," said Art Ammon, manager of the Network Operations Center at AT&T headquarters in Bedminster, N.J.

Technology and centralization have made telephone systems more efficient but also more vulnerable, Ammon said.

"There is concern on the part of government — and it's probably a legitimate one — about the reliability of the communications switch network," Ammon said.

"It's a fact that if you lose one of those control units, as we did last week, that some critical lines are going to go lost."

AT&T and the government are studying ways to switch long-distance calls through smaller phone offices in cases of emergency, which is not now possible, Ammon said.

On Thursday, April 7, an intricate system of backups failed. The worst-case scenario unfolded.

South Central Bell Telephone's \$12 million long-distance switching computer, called a 4ESS, had to be rebuilt, knocking out 30,000 telephone circuits from end to end of southeastern Louisiana. Some of the circuits carried high-level government traffic, Ammon said.

The FAA's airport control tower lost its computer link to Houston and outlying towers. Shipping operations were paralyzed. The mayor couldn't telephone the governor.

And for three hours and 56 minutes, southeast Louisiana was cut off from the National Warning System which alerts the public to nuclear attack or accidental missile launch.

Highway, tracks buckle under

SPANISH FORK, Utah (AP) — Crews were working to repair a 200-foot section of U.S. 89 and a stretch of railroad track near Thistle in Spanish Fork Canyon, where the road had buckled as much as four feet.

Lester Jester, director of the state Department of Transportation's District VI office, said Thursday the buckling apparently was caused by a mudslide on the other side of the Spanish Fork River and has damaged tracks that belong to the Rio Grande Railroad, delaying several trains.

"It's something you've got to see to believe," Jester said. "In what we call the

narrowest of Spanish Fork Canyon, there's a big sheer cliff on one side of the highway and a big mountain across the river on the other."

"The mountain slipped down and buckled just slide out into the river. But it pushed under the river and butted up against that rock wall. It raised three to four feet. It's a mess," he said.

The damage was noticed Wednesday and the Department of Transportation has been hauling gravel to the site.

"We'll probably haul in 40 truckloads

before we're through," Jester said, keeping two lanes of traffic open while we've reduced the speed limit to 15 mph.

Estimated repairs will cost \$40,000.

Dave Harmon, a clerk at the BYU office at Provo, said Thursday pony has two sets of tracks near

the site.

"One set of tracks is raised," Harmon said. "We've got one completely and we're going over the other one at 5 mph."

Executive freed after ransom paid

MIAMI (AP) — Texaco executive Kenneth Bishop arrived in the United States Thursday after being freed by leftist guerrillas who had held him captive in Colombia for 38 days. A relative said his family paid a ransom of several hundred thousand dollars.

The 57-year-old production manager for Texas Petroleum, the Colombian subsidiary of Texaco, stepped off a private executive jet at Miami International Airport about 4:25 p.m. He was whisked through Customs, then driven away.

Bishop, who appeared physically well but tired, answered few questions from reporters when he arrived late in the afternoon.

Asked if he was happy, he replied: "You're damn right."

Bishop was kidnapped March 7 in Colombia by three men and a woman who ambushed his car and killed his two bodyguards. He was released just after dawn Thursday.

A wealthy member of Bishop's family paid the ransom, a relative told The Associated Press in Bogota.

Leo Weidner,
Project Supervisor

texts every three years

bookstore change proposed

SHIDAN R. HANSEN

Staff Writer

ery year to cut costs of textbooks, said Roger Malmrose, the office's vice president.

At the present time, there are no guidelines for faculty to follow in buying textbooks purchased by faculty member looks for a book that will be appropriate for his classes and then orders it.

The office found that in some English and humanities classes, textbooks have been changed twice in the past three years.

"They [faculty] have a problem finding a decent text, at the students'

expense," Malmrose said.

Brent Laker, textbook section manager of the bookstore, said when teachers let the bookstore know what texts they will be using, 35 percent of the books are ordered.

Laker said at BYU, the textbook decision-making policy comes from the academic vice president, who then gives responsibility to the deans. The deans give responsibility to the department chairmen. Each department regulating the textbook purchases.

"Some have a free hand and others are controlled on the departmental level," he said.

If a textbook changes every year, the bookstore cannot buy back texts at the regular 60 percent of the current price, Laker said. Only the whole buy-back rate of 20 percent of the original price can be turned to the purchaser.

He said the biggest problem the textbook section deals with is the faculty's accuracy of predicting the number of books needed for each semester.

"They are relatively accurate at predicting the number of students

that will be enrolled in their classes, but they are less accurate in predicting the number of books needed," he said.

In order for the bookstore to know what texts will be needed for the upcoming semester, the faculty has to submit a textbook request before the buy-back period. If a request is not received by this time, the bookstore buys the textbook from students at a wholesaler's price and sells the book back to the publisher.

He said when requests are late (five weeks or later), and the same textbook is to be used the next semester, additional expenses have to be made to purchase the book from the publisher again.

If a textbook is continued for three years, more used books will be available to the students.

"The longer the cycle, the more savings for the students," he said. "Every time a textbook is changed, we start a new slate. The real savings is the buy back."

Laker said BYU has one of the largest buy backs in the nation. The dollars given back are top dollars—over \$30,000.

Technology building bid awarded

Layton Construction Co. of Salt Lake City submitted an apparent low bid of \$5,512,000 Tuesday for construction of a four-story Technology Building at BYU.

Ed Cozzens, director of Physical Facilities, said construction will begin in early 1984. The 48,000-square-foot structure is scheduled for completion in late 1984.

Dr. Li Douglas Smoot, dean of the College of Engineering Sciences and

Technology, said the Technology Building will be dedicated largely to facilities for the Computer-Aided Design and Computer-Aided Manufacturing programs in the Department of Technology.

The building will be located south of the Wilkinson Center on about half a block east of the Clyde Building. Architects are Fowler, Ferguson, Kingston and Rubin of Salt Lake City.

wards that denied some right to vote; the allowance students to vote, not in with bylaws; not marking cards after students voted, workers soliciting votes at the polls.

Hanna requested the remedy of having the new ASBYU Executive Council vote as representatives of the student body on whom they felt would be most qualified in the Culture Office.

However, the Supreme Court felt the plaintiffs were not able to meet the burden of proof, and denied the remedy.

ASBYU President-elect Greg Fullmer stated before the court that he was very concerned with the decision of the court and the whole issue of the election.

He said he felt the concern because he did not feel it was fair for poll workers to tell students how to vote.

In what turned out to be a heated discussion, members of the Supreme Court said they are in a difficult position. "I work from my understanding of the Constitution. People won't always agree with our decisions," said James Van Leishout, Supreme Court Chief Justice.

"We have limited power but it frightens people because we are an autonomous body," Van Leishout said.

Cougars ranked 10th, seek six-game sweep

By JOHN DALRYMPLE
Staff Writer

The 10th-ranked BYU baseball team will take its 6-0 WAC record and its 12-game winning streak to the road, facing Colorado State on Friday and Saturday before traveling to the Air Force Academy for a series closest with the Falcons on Monday and Tuesday.

According to Coach Gary Pullins, the Cougars' goal is to win all six games. "It will take a herculean effort. It's still early and these teams think they can win our division."

Against these two opponents, BYU has the upper hand in the win-loss column. The Cougars have a 65-13 record with Colorado State and a 20-5 record with the Air Force.

The Cougars have a 26-6 record this season, which is the best start in the seven years Pullins has been coach. "I think we'll be an even better team by May 1," Pullins said. "We are going to continue to play better as the weather gets warmer."

Pullins said being ranked was no big surprise. "We felt we've been ranked all along. It was a nice compliment for the players, but it won't be the ultimate thing this season."

Pressures of baseball taking toll on athletes

By THE ASSOCIATED PRESS

Baseball is no simple game. Ask Jim Eisenreich, the pressuring manager who Eisenreich, who is on the disabled list with a nerve disorder after playing just 34 games last year because of the same condition. Ask relief pitcher Kevin Sauzier, who quit because he feared a nervous breakdown.

This is a demanding avocation that sometimes consumes its participants. Mike Ivie has looked into the jaws of the beast and survived. Barely.

"My problems are my own business, nobody else's," says Ivie, who is about them.

What he will talk about is a nervous breakdown as life as the everyday first baseman of the Detroit Tigers, installed there by Manager Sparky Anderson. Ivie had been rescued from baseball's scrap heap by Anderson last May and spent the rest of the 1982 season as a designated hitter, ripping 14 home runs.

"I made up my mind over the winter that I was going to play in the field this year," he said. "Ding last year helped me get my feet back on the ground. But I like the idea of playing the field."

Was it difficult to pick up a glove after a year away from it?

"Hey," he smiled, "a fish doesn't forget how to swim."

Smiling has sometimes been difficult for this blood-thirsty player, who was the nation's No. 1 amateur free agent selection in 1979. He was a catcher then but developed problems with his wrist behind the plate and switched to first base. It was no easier there, and Ivie never quite lived up to his awesome potential with the Padres. He was traded, first to San Francisco and then to Houston, carrying the problem tag along with him.

"I know, I could always swing the bat," he said, "in led San Diego in runs batted in one year when Dave Winfield was there. I've had good years."

But they were always interrupted, it seemed, by stretches on the disabled list. In 1980, the stress reached crisis proportions and he announced his retirement from the game at the age of 27.

"If I could have been left alone, and the fans had gotten off me, it might have been different," he said at the time.

Ivie's retirement lasted three weeks. He returned after a pep-talk phone call from slugger Willie McCovey, who was resting at the time himself. The next spring, Ivie was traded to Houston and after a 7-for-18 streak in early May, he went on the disabled list because of mental fatigue. He did not play again until September. It was a washout season of 26 games.

So now, entering the 1982 season, the Astros released him. It looked like Ivie's troubled career had reached an end.

But a philosopher once noted that you start out gripping the baseball and before you know it, the baseball is gripping you, Ivie got on the phone.

"When Houston cut me, I called Sparky," Ivie said. "I had heard the Tigers and Red Sox were talking to the Astros about me. He said, 'Get here as fast as you can,' and I did."

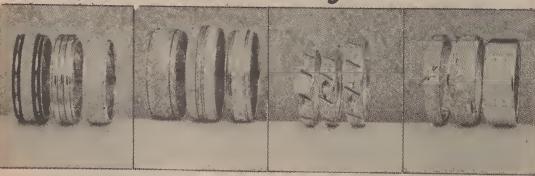

Golfers finish in middle

BYU's women golfers finished in the middle of the pack of 30 teams at 10th at the conclusion of the Lady Sun Devil Invitational on Wednesday.

Southern Methodist took the team title, and Amy Benz also of SMU took individual honors with a final score of 221.

BYU's Sue Billek had the best score for the Cougars with a 231 composite in the 54-hole tourney.

Tuckett presented Dale Rex award

BYU Athletic Director Glen Tuckett was awarded the prestigious Dale Rex award at the Annual Cougar Club banquet on Wednesday.

The award is given annually to a significant contributor to sports in Utah.

Tuckett has been responsible for great sports in BYU sports during his six-year stint as athletic director.

Accepting the award, Tuckett recalled the time he had been present for the presentation of the award and what the award meant to BYU sports.

"Dale Rex epitomized in his life the attributes we wish we had in ours," Tuckett said. "Thanks to Dale Rex we have credibility in the things we do in athletics."

Soccercats to play USU

Spring soccer action will continue when the BYU men's soccer team travels to Logan on Saturday for games against Utah State.

According to coach Jim Dusara, BYU is playing well. "We have a very good, talented team," said Dusara.

In the Cougars' defeat of Weber State, the game was tied when regulation time ran out. BYU, however, rallied for two goals in overtime to come up with the 4-2 victory.

Dusara attributed the win to the Cougar bench, since several starters were sick. Dusara said Josef Ngasa set up two goals and had an outstanding performance.

Dusara said BYU's winning streak continues with wins over penalty-kick teams, one from team captain Scott Snellson and one from Renato Domarecky.

Univeristy photo by Scott Taylor
Mike Richard Sorenson puts one down against the Pepperdine in recent volleyball action. The Cougars will battle the USSR All-Star team on Saturday.

Volleyball team face Russians

RHONDA ZMOOS

Staff Writer

Assians are coming. But they are long wool coats and blouses. They'll be in shirts, tennis shoes, and some of I undoubtedly be carrying

SSR's Collegiate All-Star team, also called the Junior team, will bump up against am on Saturday at 3:30 p.m. with Fieldhouse. Tickets are \$10.00. All proceeds to benefit from team members.

Jones, setter for the Cougars, is a chance of a lifetime." I'm getting the money and the o play that match, which he biggest game we'll play in" has been an unbreakable all. The team was able to raise all the money put up the money to feed e the Russian team during i in Provo.

um has also been without the Coach, Michael Farooq, who is taking a break from work on his dissertation. Anesh is working on a doctor of Physical Education and Early Education. "It's also hard, with finals and ev. to practice as much as we Jones said.

Jones says the team has been an unbreakable all. The team was able to raise all the money put up the money to feed e the Russian team during i in Provo.

an would definitely be an up- Russian team has been cal- best in the world by Doug

Beal, the U.S. Olympic volleyball coach. They players on this team are placed behind their own senior team, and the national teams of Poland, Canada, and the Soviet Union.

Last year's Junior National team won both the Junior World Games and the Pan American Games. The Russians warmed up for the Cougars, playing in Chicago this week before coming to Provo, Jones said. After the match in Provo, the team will head to Portland and then to Canada to play other university teams.

While the Soviet team may have some formidable talent, BYU is not suffering a talent shortage by any means. Outside hitters Brad Hammer and Larry Campbell are the highlighted spikers on the team. If they are unable to receive the set from Jones, they take it, and usually with smashing results.

Jones says the team plans to side-

out with the Soviets at the beginning of the match, and then, if the spikers do the job, the crowd can get the team going and play well.

BYU has not lost a match since they went to UC-Santa Barbara's tough tournament Jan. 28-29. Since then they have pounded Loyola at home, and seem to be headed easily to the showers. They were untouched at a tournament in Arizona March 25, beating Arizona State and some prestigious club teams along the way. They stunned a highly rated University of Arizona team in an easy 3-1 rout.

And now the biggie.

The BYU team was recommended to the Soviets by the U.S. Volleyball Association as the best team in the intermountain area. They'll have a chance to prove that at USVBA Regionals in Salt Lake. Nationals will be in Memphis, Tenn., May 17-22.

Snyder sails safely back to sack

With the ball only inches away from the first baseman's glove, BYU shortstop Cory Snyder fully extends himself while diving back to the bag at first base during this week's series sweep of Wyoming. The Cougars will attempt to extend their 12-game winning streak against Colorado State on Friday and Saturday. BYU is ranked 10th in the nation.

L.A. Raiders, Coliseum awarded millions in suit

LOS ANGELES (AP) — A federal jury awarded damages of \$11.5 million to the Los Angeles Raiders and \$4.8 million to the Los Angeles Coliseum on Wednesday in their antitrust suit against the National Football League, with the amounts automatically tripled to reflect attorney fees.

The verdict of the U.S. District Court comes in the damages phase of the antitrust suit won by the Raiders and Coliseum against the NFL last spring.

The Raiders had asked about \$20 million from the league and the Coliseum asked approximately what it was awarded.

Awards tripled

In antitrust cases, damages awarded by juries are automatically tripled unless reduced by the presiding judge. They were not in this instance.

The damages phase of the antitrust trial began July 14, and the jury of 12 men and six women deliberated 17 days and the jury of six women deliberated 24½ hours. That was more than four times longer than it took them to find that the NFL had violated federal antitrust laws by blocking the Raiders' move from Oakland in 1980.

The Raiders managing general partner, Al Davis, was in the courtroom when the damages verdict was announced.

Maxwell Blecher, attorney for the Coliseum, appeared well satisfied, but he had said, "It's a

certainly the NFL will appeal."

NFL violations

Last May 7, the same jury found the NFL's rule 4.3 was in violation of the antitrust law. It also determined the league had not acted with "good faith and fair dealing" in handling the Raiders' situation.

The rule required a three-fourths favorable vote of the 28 NFL members before one of its teams could move.

Even with the damages verdict, the litigation in the bitterly fought case continues. The original verdict is on appeal and the City of Oakland has brought an eminent domain action against the Raiders seeking to force them to return to Oakland for the public good there. That case is scheduled to begin on May 17 at Salinas.

Thunder from opposing bats clouds Guidry's lightning arm

NEW YORK (AP) —
The ball is still 1½ to 2½ feet away from the first baseman's glove, but these days the thunder from enemy bats clouds Ron Guidry's pitching.

Guidry is 32 years old, no longer the flamethrower who once had the fastest, flattest fastball and snapping slider past hitters in 1978, when he won the Cy Young award.

In that year, he compiled a once-in-a-lifetime 25-3 record with a 1.74 earned run average, and set a mark in the American League record for a left-hander with nine shutouts and set an AL mark for a lefty by fanning 18 California Angels in one game.

The past four seasons have not been anything to sneeze at — 18-8, 17-10, 11-5 and 14-8 — but Guidry lost seven of his last 13 decisions a year ago and has been hit hard in two starts this season. He gave up four runs in 5⅔ innings in a 22-3 no-decision innings against Seattle, and six runs, five hits and a loss in 5⅓ innings against Detroit. That adds up to an 11.25 ERA.

"I've always been a slow starter," Guidry said after his first victory knew him off Tuesday. "I've never set the world on fire this early."

But rarely have opposing batters lied themselves into doing now. "I don't think I caught the same Ron Guidry stuff I caught before," said Butch Wynegar, who handled Guidry with begin on May 17 at Salinas.

opener. "He was getting the ball up over the plate and it hurt him. He can't do that any more. Maybe a few years ago he could have gotten away with that, but not any more."

"He was struggling to get the ball up over the plate way he struggled with me last week. He doesn't have the velocity he had four or five years ago; he's not having the fastball or five years ago. But he's still a good pitcher, and he should come around in time. He's got this mental block about get-

ting his fastball inside on right-handed batters."

In fact, Rich Cerone, who caught Guidry against the Tigers, feels the slider left-hander's problems may be mostly mental.

"For five years now he's been mentioned in the press about Ron Guidry not ever being the pitcher he was five years ago, not having the fastball or five years ago. But he's starting to wonder," Cerone said. "I don't think he has the confidence he used to."

The Tigers, a team

times — more than any other team in his 18-year career record, didn't see the smoke that Guidry used to throw at against Guidry.

CASH FOR BOOKS

60%

TEXTBOOK BUY BACK

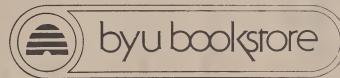

**FRIDAY, APRIL 15
through
FRIDAY, APRIL 22
7:50 a.m. to 6 p.m.!**

**Remember on Saturdays
the Bookstore's hours are
9 a.m. to 6 p.m.!**

THE BUY BACK STORY

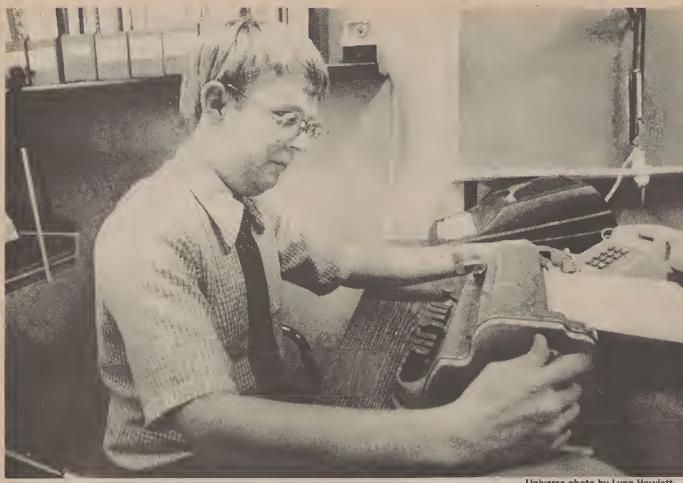

1. We are buying back books which instructors have requested as texts for future semesters.
2. We buy back books that are on our list at 60% of the new (not used) price. Example: If you purchased a used book for \$6.75 that now has a publisher's list price of \$10.00, you will receive \$6.00 for your book.
3. Remember: The publishers, *not the Bookstore*, set the list prices on new textbooks.
4. We resell our used books at 75% of the list price.
5. The books must be the current edition, the correct volume number, in good condition, etc.
6. If any of your books are *not* on our list, the reasons are as follows:
 - A. We have not received a written request from the faculty for future classroom use.
 - B. It is an old edition, programmed text, etc.
 - C. In a very few cases, we're overstocked and cannot send the overstock back to the publisher.
 - D. We have bought back the maximum limit based on what the instructors have submitted as their class enrollment.

- ★ Current BYU ID required.
- ★ Most stores pay no more than 50% of what you paid for the book. We are one of the very few that offer you *60% of the current new price*.
- ★ Nebraska Book Co. will make you an offer on most of the books that we cannot buy back. The price they offer depends on the national resale market.
- ★ We at the Bookstore understand the frustrations of exam week and have made an extra effort to buy back as many books as possible.

HAVE AN ENJOYABLE SUMMER!**

Kent McGregor, a graduate student in broadcasting, uses a braille typewriter to assist him in preparing broadcast news stories. He said being a blind broadcaster is a challenge, especially in trying to find employment. Since 1979, Kent has applied at 125 radio stations, but has not found a job yet.

Blind student broadcasts

By WENDY BLASER
Staff Writer

Looking for a job as a radio announcer can be difficult, especially if the applicant is blind.

Kent McGregor, a blind student from Boise, Idaho working on a master of arts degree, has been fascinated with broadcasting since he was four years old.

McGregor said he used to imitate radio announcers when he was young and later decided he wanted to be "that voice" on the radio. Broadcasting offers excitement and blind people need it, he said.

Blind people need it in professions such as doctors, lawyers, teachers and musicians, but most blind people have not explored broadcasting, he said.

"I plan to take the challenge of not only being a broadcaster, but doing it well," McGregor said. "It's not going to be easy, and I know that."

I hope to get a job in radio broadcasting, where and when is the question."

McGregor has access to a wire copy device from Idaho that he could use to transfer the copy into braille. He can also type and use braille to prepare news copy.

News by phone

Although McGregor cannot actually see live events to cover them, most news is gathered by phone anyway, he said.

At the undergraduate level, McGregor

specialized in broadcasting. After graduating and not being able to find a job for 1½ years, he decided to go to graduate school.

His experience includes working as an engineer at a radio station at 18, being producer for a local television news segment television station at 17, working at the rewrite desk at KBYU and as an FM news reporter and a full news anchor for FM radio.

However, sometimes experience and degrees do not count, he said. Since 1979, he has applied at 125 radio stations throughout the United States and has not found a job.

Although having a good resume is important, being blind is heavily considered, he said. "Even though it may not be fair, blind people have to do a much better job to prove themselves."

Not interested

McGregor said quite a few of the companies he has applied to have not responded to applications. If the companies are not interested, they don't respond.

Responses have been both positive and negative. Some responses have been, "It does not make any difference that you are blind, and we would hire you, but there are no openings."

One station manager, however, said he didn't think McGregor could do broadcast news because he is blind.

"I can scream discrimination but must have witnesses," he said, adding that using discrimination is only a "cop-out."

Sometimes it is not the intention of employers to discriminate against handicapped people, he said. For example, the broadcast news may desire a different voice or style of news delivery to fit into the organization.

McGregor said he has received a lot of support in his endeavor.

Teachers at BYU have been very supportive and have encouraged him, he said.

In general, however, people need to realize that "being blind is only an inconvenience," doesn't mean blind students have mental problems, just because they are visually impaired."

The general public is apprehensive and not supportive because they have stereotypes and misconceptions about blind people, he said. "I want the public to know that Kent McGregor is on his way up and not down."

Blind people need to learn to cope with their disability and shouldn't worry about receiving the praise of the world, he said.

"Graduation allows me to reflect on my past and what will happen in the future. I am nervous but not discouraged," he said.

Quite a few people get into a self-defeating behavior and need to get rid of it quickly, he said. "They need to see things in perspective and do their best."

Worthy income, few debts; then why not buy a house?

THE ASSOCIATED PRESS
How much house can you afford?

A lot of the old rules are changing. Americans generally are spending more of their income on housing than they used to. And new forms of financing mean lenders may be more flexible.

"There are not set guidelines," said Mike Wilson of the U.S. League of Savings Institutions.

If you have a steady job, few debts and a good income, a mortgage lender may calculate that you can afford to spend up to 35 percent of your earnings on housing expenses.

If, on the other hand, you've been unemployed several times in recent years and already have other obligations, a lender will set your housing budget much lower — if he or she is willing to grant you a mortgage at all.

The Federal National Mortgage Corp., the federally chartered mortgage company which buys mortgages for resale, recommends that monthly housing expenses should not exceed 25 percent of gross monthly income.

Wilson said housing expenses included not only the payment for the principal and interest, but also the cost of utilities, real estate taxes and some type of property insurance.

The price of the extra depends on where you live. The U.S. League's biennial survey of homeowners in 1981 showed the average monthly total for taxes, utilities and insurance was \$162. That's a little less than one-third of the average monthly payment of \$624 for principal and interest. A regional breakdown of charges for the same items, however, showed the monthly cost ranged from \$170 in the West to a high of \$217 in the Northeast.

A little work with a pencil and paper or a calculator can give you a rough idea of whether you can handle the house you want and can

show how important a lender's flexibility on debt can be in determining whether your income qualifies you for a particular loan.

The median price of a new house in January was \$75,500, according to the Commerce Department.

Assume you can afford a down payment of 20 percent or just over \$15,000. That leaves a mortgage of about \$60,000. The monthly payment for principal and interest on a 30-year \$60,000 mortgage at 13 percent interest, the average rate right now, is approximately \$664 a month.

Suppose your other

housing expenses add up to \$200 a month. That means a total housing budget of \$864. If you have an income of 25 percent of your income for housing, you'll need a gross income of \$3086 a month.

BEAUTIFUL DIAMONDS

Just Naturally Go Together

We've been called The Diamond People for years. Why? Because Kay Jewelers and diamonds just naturally go together.

No other jeweler will guarantee the mounting for life, and replace it free. And, guarantee the trade-in value of your diamond to increase at least fifty percent in ten years. And, take back any diamond you buy up to three months after you buy.

Not only do we offer you beautiful diamonds at beautiful prices. We offer extra assurances to help you make this important purchase with peace of mind.

Being a diamond merchant is serious business, and we've taken it seriously for over 60 years. This dedication to quality service has earned us a reputation as "The Diamond People" that we, and our customers, prize.

Midwife argument; views spark debate

By EILEEN TRUJILLO
Staff Writer

Mention having a midwife attend the birth of a baby, even to a local midwife, and it's likely to spark a lively discussion and perhaps a heated argument.

There are differing views about midwives generally, and specifically about two particular kinds of midwives.

Tradition in the American culture dictates that a physician be part of the process of having a baby and that he done in a hospital.

Rising costs and dissatisfaction with what some women say is a cold and impersonal approach to giving birth in hospitals have started a trend toward home births.

Midwives, the women who were part of having babies at home before modern medicine, have reappeared.

But county health officials say there are two kinds of midwife training and that the public should be aware that there is a difference.

Two types

The lay midwife and the certified nurse-midwife are the two types practicing midwifery in the state of Utah, said Dr. Joseph Minor, director of the Utah County Health Department.

The lay midwife is one who practices midwifery but has not received certification in Utah from the American College of Nurse-Midwives, said Cindy Grodnick, office specialist for the Utah State Department of Health, which licenses registered nurses.

Because a lay midwife is not registered by the state, she cannot charge a fee. Some lay midwives interpret this to mean that they may instead receive a donation, said Diane DeJorson, a lay midwife in the Provo area.

This donation, however, may present a problem for the mother, as insurance companies cannot reimburse the mother for this medical expense. For the companies to be able to do so, the lay midwife must be state-registered.

The term "midwife" is used loosely, and the law in Utah is vague, Grodnick said. "I suppose because the word midwife has been around so long and anyone can call herself a midwife."

Grodnick said the state does not have any jurisdiction over midwifery,

so people in this state have to use their own judgment.

State Rep. Jack Bangertner, R-Davis, said he tried to pass a law requiring the lay midwife to obtain a license. He said the action would improve the reputation of the lay midwife title.

Minor said that if a mother wants to have a midwife help her, he recommends the certified nurse-midwives, because in Utah they are regulated by law.

The title "certified nurse-midwife"

can be used only when one has passed the certification test given by the American College for Nurse-Midwives, said Lorrie Evans, a certified nurse-midwife.

Certification programs are available all over the United States to prepare for the test the college administer, but the most common one consists of a nurse's degree and then a master's program, she said.

The test is very difficult, and the American College of Nurse-Midwives is very careful about whom they pass as certified.

A certified nurse-midwife must have a doctor present when she assists with the birth, and the birth must take place in a hospital, she said.

No high risks

Most certified nurse-midwives take no high-risk patients such as women carrying twins, women over 40 years old and mothers who have had more than seven babies, Evans said.

Evans said she can spend more time with the mother than the doctor can, urging her to be in control of herself. "She doesn't have to stay in bed all the time."

"We stay with them when they are admitted, during active labor, and all the way through until the mother gives birth," she said.

DeJorson said she is a lay midwife, is registered with the County Health Department and has received a business license to practice with this title in the state of Utah.

"I have trained at the Childbirth at Home International School in California for three years and have continued educating myself by going to seminars and conventions throughout the years," she said.

DeJorson said she is trained to handle most complications without drugs and that if complications do occur, she will recommend a doctor.

Infant's care regulation overturned

WASHINGTON (AP) — A federal judge overturned a Reagan administration regulation Thursday designed to assure that severely handicapped infants are not denied food or medical treatment, saying it is "arbitrary and capricious."

Improper procedures

U.S. District Judge Gerhard A. Gesell said he found a law requiring the Department of Health and Human Services failed to use proper procedures in implementing the regulation, since it did not seek public comment.

"The solution does not, however, in a hasty, ill-considered 'Hotline' rule," he ruled.

The lawsuit was brought by the American Academy of Pediatrics, the National Association of Children's Hospitals and Related Institutions and Children's Hospital Medical Center of Washington, D.C.

Rule effective March 22

The rules were published on March 7 and took effect 15 days later. They

disabled newborns in some hospitals," Gesell concluded in his decision.

Hotline rule

"The solution does not, however, in a hasty, ill-considered 'Hotline' rule," he ruled.

The lawsuit was brought by the American Academy of Pediatrics, the National Association of Children's Hospitals and Related Institutions and Children's Hospital Medical Center of Washington, D.C.

required 6,400 hospitals receiving federal money to post notices warning that failing to provide food or treatment to a handicapped infant might be a violation of the law and could lead to prosecution.

A 24-hour, toll-free hotline was established so the department's office for civil rights could receive anonymous reports of suspected violations.

The regulation also authorized establishment of special teams to review cases where a denial of services was made on behalf of a child when it was considered necessary and refer cases for further investigation to the Justice Department.

Couple finds lost Moorhen in the garage

SALT LAKE CITY (AP) — The unexpected guest in Ed and Dorothy Shearer's garage was gathered, hungry and really lost.

Something Monday night during a heavy wind storm, a common moorhen — a pigeon-sized bird with a long, curved beak — blew into the Shearer's garage in suburban Midvale. It was the first common moorhen, or Florida gallinule, seen in Utah in 20 years.

"He supposed to be out on the Southeast Coast somewhere," said Shearer, who took the thin, white fowl to Hogle Zoo here.

The moorhen was placed among other birds in the temperate zone section of the zoo's bird exhibit building, where it was doing "great," assistant director Gene Schreiber said Thursday.

Schreiber said moorhens — marsh birds that like to feed on fish and worms — were last spotted in Utah in 1962, although there's a chance there may be a small resident population near St. George, 300 miles south of here.

"It's like finding your arctic owl this far south," Schreiber said.

Labor to vote on copper pact

PHOENIX (AP) — The tentative Kennebott economic package on which labor leaders will be voting Saturday bypasses general pay increases but continues the current contract's cost-of-living adjustment on wages, a union source says.

Negotiators for Kennebott and 14 labor unions reached the tentative agreement here Wednesday but released none of its terms pending a ratification meeting of non-ferrous and other union leaders Saturday.

But the Tucson Citizen said Thursday a union source said that besides the pay freeze and COLA provisions, the proposed settlement also provides that workers on the company payroll and others laid off temporarily will continue to get the same fringe benefits, but that medical insurance and other benefits will be reduced for workers hired in the future.

The proposal covers about 3,000 workers in Maryland, Nevada, Utah, New Mexico and Arizona, though many are currently laid off.

Here's timely news about long distance rate periods.

Suppose you begin a fifteen minute, out-of-state long distance call at 10:58 p.m. on Monday. You'll talk for two minutes during the 40% 5-11 p.m. evening discount period. And thirteen minutes in the following 60% 11 p.m.-8 a.m. night discount period.*

In the past, you would have paid the earlier 40% discount rate for the entire call. But that's changed. Now you pay the amount applicable to each period. That same Monday night call will be charged two minutes at the evening rate and thirteen minutes at the night rate.

The same applies to calls made before 8 a.m. on weekdays. Calling time is billed at the night rate before 8 a.m., and at the full weekday rate afterwards. So if you want to save 60% on your long distance call, be sure to finish the call before 8 a.m.

Find out more about long distance rate periods in the Customer Guide. It's in the front of the White Pages. Or call your service representative. For the best times to call long distance.

For the way you live.

Mountain Bell

*Discount rates for in-state long distance calls may vary from out-of-state rates. Check the Customer Guide or call your service representative.

"The graduate parents are dedicated to helping other parents who are going through the same thing they did," she said.

Parent-to-Parent is a non-profit, private organization, and there are no costs for parents to join.

Acting president of the Utah County chapter is Larry Schaugard. He and his wife, Kris, are graduate parents.

"Our goal is to help parents get through the time while their baby is in the hospital. We don't offer professional counseling. We give parents a chance to talk to other parents who have been through the same thing."

He said it is often difficult for parents to talk to an outsider about their critically ill baby unless the person has actually experienced the same thing. The Utah County Chapter has been in existence for seven years. It has just recently gained the recognition by the hospital (Utah Valley)."

He said it is the only hospital in the area that deals with critically ill children. "If your baby is born in Payson or some area around here, you'll have to bring the baby to Utah Valley."

The chapter meets every Tuesday with the Social Services Department at the hospital and operates on a budget. "We try to keep it low so people can meet and that is our first concern. We don't talk to the people directly but act on referrals."

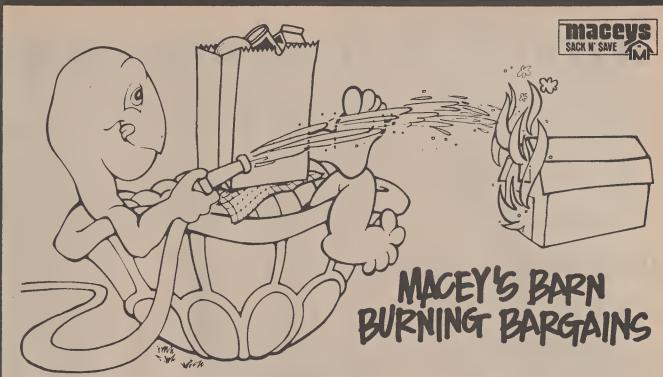

Schaugard stressed that the chapter is not a professional group nor is it associated with Utah Valley Hospital.

The chapter holds monthly meetings for its members, in which problems of members are discussed.

It is primarily a forum for parents to share their feelings and give support to each other.

Parent-to-parent offers personal counseling and

companionship to all parents of babies placed in the intensive care unit.

Artificial-heart connectors

Aspirin lid inspires design

SALT LAKE CITY (AP) — The cap on an aspirin bottle was the inspiration for the snap-on connectors that linked Barney Clark's artificial heart to his circulatory system, says the technician who designed the original.

"I had a bottle of aspirin sitting on my desk. The way it was was the way it was needed for the heart," Jerry Foote, former research assistant at the University of Utah's Artificial Organ Division said Thursday.

Foote, who has since left the university for an engineering job, called inaccurate a doctor's com-

ment earlier this week that the inspiration for the connector came from Tupperware lids.

The comment reportedly was made to a group of electrical students by Dr. Lyle Joyce, one of Clark's attending physicians.

Joyce was not immediately available for comment Thursday.

Foote said the connectors on the Jarvik-7 heart which beat in Clark's chest for 112 days until his death March 23 don't even fit like Tupperware lids.

"A Tupperware lid uses an inside and outside division," he said. The lids of the company's plastic

kitchenware have a groove that fits over the edge of the containers on both the inside and outside.

The artificial heart connectors work differently, he said.

During surgery, soft Dacron cuffs are sutured to the patient's atria, aorta and pulmonary artery.

The valve openings of the mechanical ventricle are then "popped" inside the lips of the cuffs and are held fast by a "triangular support" running around the outside edge of the valve openings, he said.

The connectors are made of a material similar to Polaris nuclear-tipped missiles for the British navy, the Pentagon has

Manufacturers of food bend to no-salt desires

By THE ASSOCIATED PRESS

A growing number of food manufacturers are learning that what they leave out of their products can be as important as what they put in.

They are introducing a no-salt or low-salt lines to attract consumers who are concerned about sodium in their diets.

At the same time, the Food and Drug Administration is almost ready to issue a final rule requiring some processors to list the sodium content of their foods and setting standards for terms like "sodium free" or "low-sodium."

Sodium is a necessary part of the diet. It attracts and holds water in the blood vessels, helping maintain blood volume and pressure. Too much sodium, however, has been linked to high blood pressure, a condition which affects about 60 million Americans.

The National Academy of Sciences has said that daily sodium intake of about 1,100 to 3,300 milligrams is safe and adequate for most people, but government estimates indicate the typical adult consumes three to four times the maximum recommended amount.

You can start cutting sodium by leaving the salt shaker off the table, since one teaspoon of salt contains 2,000 milligrams of sodium.

Salt added at the table is only a small part of the problem, however, and that's where the new regulations and products will help.

Processed foods — particularly canned vegetables and frozen vegetables in a sauce — often are

high in sodium since salt is added during cooking. But until now, it is hard to tell just how much sodium was included in a serving.

The situation has changed in recent months. More than half of the processors surveyed late last summer by the American Frozen Food Institute said they either already labeled their products with the sodium content or had plans to do so. Some restaurants are posting signs giving the salt content of menu items or promising their food is prepared without monosodium glutamate or MSG.

The FDA is going ahead with mandatory labeling for at least one segment of the market — those processors who already are required to use nutritional labels.

The rule as proposed last summer and FDA spokesman James Greene said a final version is expected late this spring. It would take effect in 1985.

Farmer, patience tried tells council 'make hay'

BISMARCK, N.D. (AP) — State Rep. Bruce Larson is fed up with North Dakota's longest legislative session and on Monday he left a not-so-subtle hint in the legislators' parking lot.

Larson, a farmer-rancher from Sheyenne, said, he rented a tractor and drove it to the Capitol as a way of saying it's time to wrap things up.

Larson says his cattle are calving, his high-school age son is running the ranch operation with a part-time job and "every day I stand here, it's costing me money."

The longest previous legislative session ran for 67 days in 1977. Monday was the 67th working day of the current session, and legislators expect it will take until at least until the end of the week to finish their work. By law the lawmakers can meet a maximum of 80 days for their biennial session.

On a metal track ten stories high, Robert walks with a tool, inspecting "Colossus," Lagoon's newest roller coaster, 23, has worked at Lagoon since he was a junior in 1971. Each day he puts the new ride through a major inspection. "I look for bolts missing and cracks in the structure," he said. "I do every day that I'm most concerned with is the cars." According to the daily inspection, weekly and monthly checks make up a page checklist of safety items. Once the inspection is complete, three trains — each carrying 28 riders — thrill as many as 840 passengers an hour.

It was constructed by the Schwarzkopf Company. The Westinghouse also built Jet Star II, another major midway attraction at

At a cost of \$2.5 million, the new ride is the park's largest single expenditure since the construction of Pioneer Village in 1976, according to Ron VanWarden, advertising and promotions manager for Lagoon.

The ride's main attraction is its double loops. After a ten-story drop, the roller coaster train enters the consecutive loops at 55 mph, he said.

Speed not only increases the thrill of the ride, but adds to safety as well. "A computer checks car speed and location along the track. If the car goes too slow or anything goes wrong, the ride shuts down," VanWarden said.

Though total construction time for the ride took about two months, including fencing and landscaping, the assembly of the entire steel structure took only a week.

The ride was built to be moveable, according to Harvey, and was operated in Germany for a year before it was disassembled and brought to Lagoon.

A supervisor from Germany oversaw the assembly of the 2,856 feet of steel track that makes up the ride. He gave instructions for specific procedures through a Lagoon employee who speaks German.

Even though the ride has operated only one weekend since its debut on April 3, the all-steel structure has already had a genuine test of its strength.

One-hundred-mile-an-hour winds during a storm the week after its completion damaged other rides, road signs along the freeway and even overturned a train more than a mile downwind of Lagoon, but the roller coaster was not damaged.

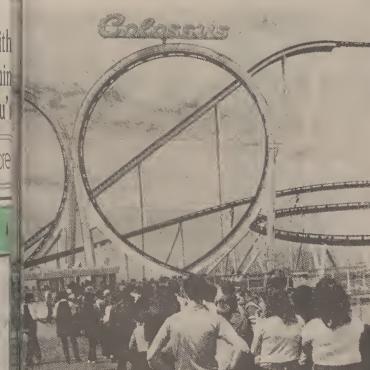

If the pre-season crowd is an indication of Colossus' popularity, the ride is in for a busy summer. "You'd better not take my picture — I may be saying something obscene," said one rider as the train began its initial incline. A minute and 45 seconds later, most riders were too spun to describe their ride in more than a word or two before running to get back in line.

TOP LEFT: The expression of these two riders goes well with the sign at the ride's entrance that cautions heart patients and expecting mothers about the vigor of the ride.

BOTTOM LEFT: Riders lined up for more than half an hour waiting for inspections to be completed before the roller coaster opens for the day.

TOP RIGHT: The loaded train nears the bottom of a 10-story drop before entering two consecutive loops at a speed of 55 mph.

BOTTOM RIGHT: Maintenance worker Robert Harvey files rough track surfaces and checks bolts and connections for wear.

America here on Saturday

By ELLEN FAGG
Entertainment Editor

Right out of high school, they had a hit single, "Horse With No Name," that peaked at No. 1.

Thirteen years later, America will perform in the Marriott Center Saturday night at 8 p.m., riding the energy of their most recent, commercial success, last summer's No. 8 single, "You Can Do Magic."

Along the way, Gerry Beckley and Dewey Bunnell lost co-founder Dan Peek to a solo career and refined the chemistry of their performances.

It's their differences that keep them together, said Beckley in a phone interview with The Daily Universe last week. "Dewey and I are not knocking at each other's doors musically, which has helped keep us together." Beckley said his partner writes "surreal" songs like "Horse With No Name," while his own songs are "down-to-earth and emotionally honest."

America built their reputation in the early 70s, winning a Grammy Award in 1972 and Billboard's "Best Singles Award" in 1975, with powerful hits such as "I Need You," "Ventura Highway," "Tin Man," "Lonely People" and "Sister Golden Hair." Their greatest hits album became a record collection staple; their singles were the slow songs played at every high school dance.

Beckley said America enjoyed their early success because they were able to capture the feeling of the era. But those elements faded; music styles changed as the group discovered.

"We continued to work, doing everything as well as we could," Beckley said. "But for a few years our records were just not selling."

Beckley said after 13 years of performing, America's music has improved. "Lately, we've received a very strong reaction to our show. We're performing better than ever."

In 1980, America released "Alibi," an album with the picture of a baby doll's head lying in a desert on the cover, a contrast to the usual smiling picture of the musicians. Beckley said they chose the picture because it was "bizarre and sure looked great." Critics hailed the album as a major departure in style for America.

"Big deal," said Beckley of the musical "change." "When they say your new music has a harder edge, all it means is that they haven't heard your last albums."

Beckley and Bunnell's last album, "View (From The Ground)," hit the market in July of 1982. Though they usually record only their own songs, Beckley said they chose to release Russ Ballard's "You Can Do Magic" as a single because it had a commercial sound.

Grown-up's job considered 'play'

By LORI STEPHENSON
and JANET BALLIF

Puppets are not just child's play, but they have become a rewarding hobby and profession for LynnAnne Richards, the mother of eight children.

Richards, a University of Utah graduate student in children's theater, has taught classes in marionettes at BYU during terms.

The marionettes, which Richards creates herself, were on the cover of the 1982 family home evening manual. They have also appeared in commercials, book and tape sets and children's performances.

Thirteen years ago Richards began working with the art of puppet-making as a hobby in her home. She constructs the puppets in a small room in her house that is said to resemble Geppetto's workshop.

After being involved with puppet-making for many years, she became interested in doing something more professional with the skills she had developed.

She explained the idea to four of her friends, and they decided to start a non-profit corporation called "Strings 'n Things."

The four women began writing stories based on biblical tales, constructing marionettes and putting together a traveling group of puppets that could bring to life the world of biblical characters.

Constructing the puppets takes from 30 to 50 hours each because of their size and intricate detail.

The materials for construction cost \$30 to \$50 for each marionette. In her puppet-making class, students will learn classical ways of creating professional marionettes, she said.

Performances and sales of tapes and books featuring the puppets have not yet been profitable, but Richards said she finds rewards in teaching and providing valuable shows for children.

Although she is busy with puppet-making and performances, Richards said her family's relationships haven't suffered. The whole family has participated and grown from the experience. Richards said she believes that it is important for mothers to have something to do outside the home.

Under the department of Theater and Cinematic Arts, Richards will be teaching the marionette class from May 3 to June 23.

CALENDAR

The Varsity Theater will be showing "Raiders of the Lost Ark" this weekend. Showtimes are at 4:30 p.m., 7 p.m. and 9:30 p.m. Next week, beginning Tuesday, and continuing through April 22, "The Runaway Bumblies" will be shown.

The Film Society will be showing "Singing in the Rain" on Saturday at 7 p.m. in the ELWC Auditorium.

The Weekend Movie will be "Star Wars." Showtimes are 6 p.m. and 8:30 p.m. in the JSB Auditorium.

BYU opens its doors for BYU's Ambassadors as they perform in the Orient this spring beginning April 26th.

R. McConkie of the School of Twelv will join the group as they present the film KBYU documentary "Shanghai Dancers" as part of their tour at BYU. The purpose of the film was to raise money for the Chinese by answering the question of what the Chinese ask about strengthening their understanding of the Church of Jesus Christ of Latter-day Saints and the excitement and changes between the people of the Orient and the people of the world.

Booth
Very popular with the university better known than BYU," This is our media contact and telecast of BYU performers,

Ambassador spreads love with songs

By ELLEN FAGG

Entertainment Editor

Jan Broberg stands backstage, hidden in the heavy stage curtains.

She will be under the spotlights again in a minute, but now she has just enough time to change her costume for the next number while she harmonizes on background vocals.

Jan, a junior from Pocatello, Idaho, majoring in musical theater, is performing with the Young Ambassadors as one of the international guests sponsored from New Zealand, Australia and Tahiti, the countries they will be touring in two weeks.

The Social Hall stage is small, smaller than the stages they will be performing on next month. Back under the spotlights, the intimate atmosphere allows Jan to wink at the audience while sitting on the floor in front of the stage.

The words and the steps come easily; the group has been practicing the numbers in this show since September, and performing it on weekend and short tours for the last four months.

The show went well tonight. The hours of long practices seem to fade in the thunder of the applause. After the show, Jan and the rest of the group step down from the stage to meet the audience. "Thank you for coming," she says sincerely, receiving smiles and handshakes. She picks up the little girl who is fingering the flashy sequins on her pink dress to give her a big hug.

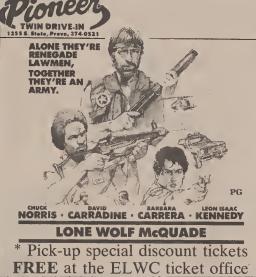

When the audience has slowly filed out, when the large room and the chairs are empty again, it's time to strike the set and pack up the equipment. Everyone has their own job; the performance isn't over until the stage is empty.

It isn't always easy to be a Young Ambassador, to juggle practices and performances with classes and studies. Many squeeze in part-time jobs. Members of both groups — who are pursuing degrees in areas as diverse as accounting, chemistry and zoology as well as dance and musical theater — are assisted by their natural talent and their love of performing.

When Jan performs with the group who have become her close friends and who she calls "high-quality and multi-talented," more than anything, she wants to communicate to the audience the joy of living. "Performing grows out of a love you have for other people," she says.

If we can communicate something that will change their lives in some small way — even if it's only for the rest of the evening — then it's all worth it."

The lights are dimmed now. In two weeks the tour will start and the show will go on, this time in Tahiti and New Zealand and Australia.

* Pick-up special discount tickets FREE at the ELWC ticket office

Spielberg cast sick at deaths

LOS ANGELES (AP) — "No movie is worth dying for," says director Steven Spielberg, who said he was "sickened" by three deaths last July on the set of "The Twilight Zone."

Jan Broberg stands backstage, hid-

den in the heavy stage curtains.

She will be under the spotlights again in a minute, but now she has just enough time to change her costume for the next number while she harmonizes on background vocals.

of songs is one way local radio stations increase ratings. One DJ said the majority of listeners

don't even notice the song has been played a few minutes before.

Keys keep music consistent

Listeners determine format

WAYNE WATSON
Staff Writer

Listeners, program directors and audience are all involved in the music format of FM stations, according to Robert Boland, director for a local FM station. "Just a few listeners think we control the type music played on the air," Morey said. "But leaves that responsibility in a station's hands. If a station increases its music consistent all day," he said. The problem, however, is how often a song can be repeated without the listeners becoming annoyed.

A station program director, he said, stations are just like business in the community. It is to make money. When you know which audience a station

Companies raise prices by four cents

THE ASSOCIATED PRESS
Gasoline increases this week by big oil companies will be matched with the April 1 boost in gas prices, seeking to increase their profits and price wars have raised prices as高

gasoline taxes effective April 1. "We are tracking gasoline prices at 17.00 nationwide," said "It is almost impossible to predict what will happen with gasoline prices as well as the wholesale price increases as well as the increase will be passed on to customers."

"We have seen the bottom in gasoline prices," said William Randal, a petroleum analyst at the investment firm First Boston.

The latest increase was a move by Amoco Oil Co., the nation's leading oil company, to raise wholesale prices by 1.7 cents in the Milwaukee area and by one cent in Peoria, Ill. Just a day earlier, Amoco's marketing arm of Standard Oil Co. increased prices by a half-cent to one cent a gallon in other marketing areas, including Louis, Baltimore and Washington,

Ill. It has raised wholesale prices by one cent a gallon in parts of the West and 2½ cents a gallon elsewhere.

covers, they are more likely to advertise.

"Most FM stations are faced with the battle to find their niche in the targeted listening group between 25 and 54 years of age."

Sometimes a station will ignore the request lines because the songs may alienate the rest of the listening audience, Morey said. "It's a common practice to oftentimes ignore many requests because the majority may suffer because of a minority."

He said the majority of listeners do not call and make requests; they love the music and the DJs, but they're too busy to play a song over and over again.

"It seems as though stations will play a song into the ground, and then come up with another one to take its place."

He said his music taste will usually center around one station, while using other ones as second or third choices.

Radio announcer Dave Scott said everyone usually has three or four songs they really want to hear and have others they don't like or have heard too much.

"The problem arises when a person listens to a station for an extended length of time and hears everyone's favorites time again."

"It just goes to say that the longer a person listens to a station," he said, "the more apt the person is to get fed up with everyone else's favorite songs."

Scott said it's important for listeners to listen to the DJs and wait a while before playing a special request.

"Most of the time the listener just turned the radio on and didn't realize the same song was played only a short time before. If we were to play it again to please the caller, we'd alienate those people who've been listening for a longer period of time," he said.

Morey said 40 percent of the population in Utah is between the age of 12 and 24. "This high percentage explains why many stations have geared their music selection to these younger listeners."

Central America operations legal Reagan asserts

WASHINGTON (AP) — President Reagan said on Thursday that the United States is not doing anything "to overthrow the Nicaraguan government," but is trying to block military supply lines to rebels in neighboring El Salvador.

U.S. law requires the administration to go into negotiations with the Nicaraguan government. But he said his administration is complying with a federal law that forbids U.S. action to overthrow the government of Nicaragua.

Reagan is complying with the law, Reagan told a news conference in the White House press room. "We are complying with that fully."

Covert operations

Rep. Edward P. Boland, D-Mass., has said the administration may be acting in violation of the ban on covert operations against any government in Nicaragua. Boland sponsored the law.

While Reagan said he is keeping the administration in question the wisdom of the ban. He said any legislation restricting a president's power to deal with foreign nations impinges on the constitutional powers of his office.

The brief session with reporters was dominated by questions about Nicaragua. Boland has said his House intelligence committee will summon top administration officials to look into U.S. operations in Central America.

Reagan said the world is growing more aware of the situation there. He said the Nicaraguan regime took power by force, is clearly Marxist, and has reneged on promises that it would not try to overthrow neighboring governments.

"Whatever we are doing in that area is simply to interdict the flow of rebel forces in El Salvador," Reagan said, "not to bring down the Nicaraguan government."

FINISH YOUR DEGREE THIS SUMMER

If you're close to graduating, why not take two or three courses through Independent Study and graduate this August. There are over 330 courses offered that can help you graduate this summer. (Or just get a head start on fall semester.) And you can still keep your summer plans intact.

With intensive study some courses can be completed in as little as one month or you may take until the July 30 deadline for this August's graduation. You can even take up to a full year to complete your course.

Courses cover all the G.E. areas and there are more than 200 upper division courses offered.

For a free catalog of courses or for more information, stop by room 206 in the Harman Continuing Education Building—just northeast of the Marriott Center.

No Sunday play in Georgia**Y's winning chances limited**

By SHERIDAN R. HANSEN

Staff Writer

The BYU College Bowl team finished in the top eight teams at the Annual National Invitational Tournament last weekend with a 9-4 record at Emory University in Atlanta, Ga.

The NIT title was awarded to Michigan State, making them a two-time winner of the title.

BYU was asked to compete in the fifth annual tournament after the team won the regional competition without a single defeat.

Gladys Farmer, team coach and a part-time English instructor, said because the team did not compete on Sunday, its chances of winning the national title were limited.

She said the team was proud that they had beat the winner, Michigan State, and Princeton, the fourth place team, on Saturday.

Of the top teams, the BYU team also beat Ohio State, Duke and Indiana. BYU

lost to four other teams, including Harvard.

The College Bowl team was invited to compete against the strongest 19 bowl teams in the nation — 11 regional winners and eight runners-up.

Each participating team submitted questions to be answered by the other contestants, and totals then determined the winning school.

"The questions were really hard," Farmer said. "Each college wrote the hardest questions they could."

She said the questions were obscure but not trivial.

Although the team missed competing with the others on Sunday, Farmer said the team felt good about their performance that may give them consideration for the upcoming College Bowl national tournament.

Farmer reported that at the end of the tournament, the competition director said he was impressed with the humor and sportsmanship of the BYU team and plans on changing the tournament to a Friday

AWARDS**Harry S. Truman Scholarship**

Anne Rowley, a sophomore from Layton, Utah, majoring in political science was awarded the Harry S. Truman Foundation scholarship of \$20,000.

Service Medal

Maj. Larry R. Hanson, an assistant professor in the Air Force ROTC program at BYU, has been awarded the Air Force's Meritorious Service Medal for his contribution to national defense while at Wright-Patterson Air Force Base, Ohio.

A member of the faculty, Hanson received the medal in connection with his work as head of several high-priority Air Force programs, including the Space Division's globe positioning system, the tri-service survival avionics system and the Department of Defense test mission on advanced range instrumentation aircraft.

Grant Speed Award

Ben E. Lewis, former executive vice president of BYU, received the prestigious Grant Speed Award at the 1983 National Space Education and Sciences awards banquet. The award is given annually to someone who has provided valuable help and service to BYU agricultural programs.

Lewis was instrumental in helping the BYU Agriculture Station grow from a small struggling farm to the productive one it is today. It was the response to Lewis's initial fund-raising efforts that brought about contributions to build the Leo Ellsworth Meat and Livestock Center. Lewis retired from BYU in 1979.

Research award

Dr. Terrance D. Olson, a professor of Family Sciences at BYU, is the recipient of a grant for almost \$180,000. The grant was awarded by the Department of Health and Human Services for studies on a family centered program for prevention of adolescent pregnancy.

Management interns

BYU students D. Bryce Baker, Ginger Gardner, William Greer, Ann Jensen, Michael Kelly, Christopher Masiabi, Zenas Moreno and Gwen Aguirre were selected as Presidential Management Interns from the Institute of Public Management's class of 1983.

The Presidential Management Internship program selects up to 250 participants who receive a two-year management internship with the federal government. The internship allows the students to develop management skills that can be used later in their careers as public managers.

Engineering awards

The BYU chapter of the American Society of Mechanical Engineers sent five competitors Saturday to the competition in Fort Collins, Colo., to compete in the speech and tank contests, and all five participants took prizes, said Paul Jones, ASME chapter president.

Rich Beaufort, a senior majoring in mechanical engineering, won first place over 18 other contestants in the speech contest. He spoke on the topic of

Policeman suspended, bares legs in City Hall

SWEETWATER, Fla. (AP) — After baring his legs in City Hall, police Sgt. Ray Toledo was suspended for three days. Now he says he'll fight for the right to wear shorts to City Council meetings.

"If I have to go all the way to the Supreme Court, I will," said Toledo, wearing a pair of navy-blue slacks. He spoke to a small group of supporters Monday after the council voted to uphold the suspension which cost him \$223 in pay.

steam engines and included slides and working equipment with his presentation.

David McMurry, a graduate student in mechanical engineering, won \$25 in the speech contest for the best technical presentation.

In the tank contest, Jeff McAllister won first place for his design of the simplest design. His tank was a toy jeep. For running quickly, stopping precisely and shooting its dart accurately, it won him a Hewlett-Packard calculator. He also won an alarm clock kit for design.

Glen Rockley and Kirk Allred, both seniors in mechanical engineering, took the first prize, another alarm clock kit, for best manufacturing quality. Their tank was electrically powered.

Industrial education awards

The Department of Industrial Education awarded scholarships to outstanding students at their awards banquet.

Scott P. Forsyth from Cardston, Canada was honored as the outstanding academic student. With a grade point average of 3.94, he has the highest grades in the College of Engineering Sciences and Technology.

Earl Bishop of Rigby, Idaho was selected as the outstanding student of the year. He has excelled in manufacturing and woodworking, building some of his own production machines.

The outstanding service award was given to Duane Thompson of McGrath, Alberta, Canada. He served as an officer for the student Vocational Industrial Clubs of America chapter and has worked for several jobs for the department.

A plaque and a set of lathe turning tools were awarded to Fredrick Show Low, Ariz., for being the best woodworking student. He is a lab assistant in woodworking.

Dr. Garth Hill received a plaque from the senior students for being the faculty member who had been most helpful to students.

GOING SOMEWHERE??

Did you know that you could continue your BYU education even if you're not staying for summer term? With BYU Independent Study, you can. There are over 330 courses that can keep you moving toward your degree. You may even be able to move up your graduation date. Let us help you. Governor gets letters plus a couple of shirts

LANSING, Mich. (AP) — Five disgruntled Michigan taxpayers have sent Gov. James Blanchard the shirts off their backs since his proposed income tax increase was passed.

Donna Kauffman, who's in charge of the governor's mail, said Tuesday the state's recent 38 percent income tax increase has been the major subject of letters sent to Blanchard during his first months in office.

Not all the writers are irate and some enclose money for the state, Kauffman said.

IMPORTANT NOTICE FOR ALL INSULATION SALESMEN IN NORTHERN CALIFORNIA

On April 6, 1983 the California Public Utilities Commission rendered decision #8304015.

This decision affects the attic insulation program sponsored by Pacific Gas and Electric Company in all areas of Northern California.

Said decision lowers the ceiling price on insulation from \$.65 per foot to \$.48 per foot for cellulose and \$.52 per foot for mineral wool.

This is an effective drop of 20-26% which will significantly alter your summer earning potential and drastically change your commission structure.

This decision will not affect the program in Southern California sponsored by the Southern California Gas Company.

If you would like to know more about working in Southern California, please call us or come to a short, fact-filled slide presentation.

Date: Friday, April 15

Time: 11:00, 2:00, 5:00

Place: 2696 N. University Suite 180, Provo

question concerning cause

West Bank epidemic strikes

A, Occupied West Bank (AP) — The epidemic struck this remote West Bank town on March 21. Before it ended later, more than 300 Palestinian schoolchildren hospitalized.

The victims, say Israeli health authorities and "procurators," charges as strongly deny. They say the Israelis

shot poisoning their children.

Reporters from the International Committee Cross, the U.S. Centers for Disease Control and other organizations examined victims, but so far have issued no report on the puzzling events that started in Arraba, 17,000 Palestinians 45 miles north of Jerusalem.

At a girl's high school when several girls were sickened by the odor of rotten Baruch Modan, an epidemiologist and member of Israel's Health Ministry, believed was hydrogen sulfide gas from a pit.

Complaints

Hours later, dozens of other girls, complain of illness, nausea and blurred vision, became mid-morning recess. It was the start of hysteria, Modan said. Arraba's mayor Matal-Fatih al-Arda said 69 girls were sent

to hospital. On March 26, a second outbreak hit six girls around Jenin, six miles northeast of almost 250 students were sent to the hos-

pital. Modan believes the outbreak was caused by the rumors of poison gas.

Modan and Palestinian stored Israeli gas in Jenin, and soon all the town were placed under curfew. Israeli military sources, paradoxically, contributed to the poisoning rumor by saying that Palestinian militants might be spreading poisons to place Israel in a bad light.

No evidence

The total of victims climbed to 320, but no one was reported seriously ill. Modan announced that army, police and health ministry investigators found no evidence of deliberate or inadvertent poisonings. Modan was unable to rule out a psychosomatic cause for the illnesses.

That evening, a car or van, spewing smoke from its exhaust, drove through a residential neighborhood in Jenin. Almost 80 people were rushed to hospitals. Modan called it wave three in the epidemic. The victims still were genuinely ill, he said, but the physical cause could be found.

On March 29 Jenin was sealed off by Israeli troops and remained so a few days. Reporters were not permitted to enter. In Arraba, al-Arda and other West Bank leaders demanded an investigation to determine "what the poison is and the people responsible for doing it."

Palestinian doctors reportedly attributed the illness to "poison gas" though they acknowledge they have no idea what the gas is.

One doctor who said he believes a poison was at work said he also agrees that psychological factors contribute to the symptoms. "But underground

there is a triggering factor, and that's what we are searching for," he said.

Doctors quiet

None of the Palestinian doctors would permit use of their names, saying they feared they would be fired from government hospitals if they dispute the Israeli position.

Modan held a news conference April 1 with the head of the Israeli medical corps to repeat that there was no evidence of poison.

Brig. Gen. Shlomo Ilya, the head of the Israeli West Bank administration, charged that Palestinian extremists were trying to stir up a frenzy against Israel.

On April 3, a fourth wave of the epidemic hit, striking a village near Nablus and in Hebron, in the southern part of the West Bank. About 400 schoolgirls went to hospitals, bringing the total number of girls affected to over 800.

Modan believes some of the latest victims were affected by rumors of poisoning."

Modan says a Red Cross investigator agreed with his conclusion that the poison was psychosomatic at the root of the epidemic rather than a poison, but the Red Cross has declined comment.

A spokesman for Israel's West Bank administration claims the CDC doctors privately agreed with Israeli findings that there was no poison but would not say so public "for fear their opinion would be regarded as too pro-Israel."

The American doctors, preferring to keep a low profile in their scientific investigation, have refused to meet with reporters.

Thousands lost to students because of bicycle thefts

Over 100 bicycles, valued at \$14,867, were reported stolen from BYU students last school year, said Arnie Lemmon, University Police sergeant.

"Students and faculty should not leave their bikes unlocked in any area, for any length of time," Lemmon said.

The number of thefts could be re-

diced by almost 98 percent if bikes were locked properly, he said.

Lemmon said students should license their bikes, always lock them and keep a record of the bicycle serial number. When a bike licensed with Provo City is stolen, the serial number can be listed with the National Crime Information Center computer system.

Education, tax deductions combine

By THE ASSOCIATED PRESS

Would you like to save for your children's education and trim your federal tax bill at the same time?

President Reagan has proposed another way to save: tax-sheltered Education Savings Accounts which, in some ways, would be similar to Individual Retirement Accounts. But the details of the program have not been worked out. Reagan called for creation of the savings incentive early this year and

a "Clifford trust." It must run for more than 10 years and the property you put in it must remain there for more than 10 years. The trust also must be irrevocable; you can't change your mind.

President Reagan has proposed another way to save: tax-sheltered Education Savings Accounts which, in some ways, would be similar to Individual Retirement Accounts. But the details of the program have not been worked out. Reagan called for creation of the savings incentive early this year and

again in his radio address on Saturday.

The idea behind the Clifford trust, according to Sidney Kess of Main Hurdman, an international accounting firm, is to shift income which you normally would receive yourself to your child, or to the trust on your child's behalf. That means the money will be taxed at a much lower rate.

"People can contribute up to \$1,000 of income, the parents assign cash or some other property to the trust," Kess said. "This cash or property generates income, which is either held in the trust or passed through to the child . . ."

The first \$1,000 your child earns is tax free; it's covered by the \$1,000 personal exemption. In addition, your child is entitled to a \$100 dividend exclusion; the first \$100 worth of dividends earned is also tax free. For example, in 1983, a child with \$450 in investment income also will be exempt from taxes.

Tax experts at Prentice-Hall offered an example of how the plan can work:

Suppose you have a four-year-old son who will be ready for college in 14 years. Set up a trust to last for 14 years. Transfer enough stock to the trust to provide the boy with \$1,100 in dividend income per year. That \$1,100 is deducted from your income and is tax-free to your son. You can earn your own tax bill. And unless your son has income from another source, he owes no tax at all on the \$1,100.

Assuming your son banks the money, he'll have \$15,400 from the trust alone when he is ready for college. He also will have whatever interest he earned while the trust was in existence.

The plan has many ways to generate income from the trust; it can be used to accumulate on it can be paid to the child. Kess said the money does not literally have to be handed over to a youngster; it can be given to the parents to bank in the child's name.

Unless your child has substantial income from the trust, it generally makes more sense to pay him or her the income from the trust because there will be little or no tax due. If the child does have other income, however, you may want to let the income from the trust accumulate.

James Pearce, spokesman for Wyeth Laboratories, maker of Ovral, said the company had not seen the report and had no comment. A spokesman for Parke Davis of Morris Plains, N.J., maker of Norlestrin, had not returned a call asking for comment.

Alt-A-Glance

All submissions for Alt-A-Glance must be received by 1 p.m. the day before the publication. All items must be done in 8 1/2 x 11 inches typed on an 8 1/2 by 11 inch sheet of paper. Items will not be published for more than three consecutive days, and submissions of a commercial nature, or which advocate a particular point of view, will not be accepted for publication.

Machine 'invasion' here

By MARK HALL
Staff Writer

The day of the robot has arrived, according to Charles Bates, president of Valetek Corporation.

For a host of reasons, robots have been invading our factories—and even more recently, toddling into our homes, Bates said.

In 1961, the world's largest builder of robots, Unimation, Inc., sold its first robot. This robot poured hot metals into a die for General Motors. However, according to Bates, robots have been around since before the 1960s.

The root of a Czechoslovakian word meaning "work," was found beginning in 400 B.C. when a flying wooden pigeon was made, said Tim Brown, a BYU student and Valetek Corporate Communications intern.

Encyclopedia Britannica reports that "Voder," a robot that electronically reproduced vowels, consonants and monosyllables, was introduced in 1939 Philadelphia's demonstration, Brown said.

Todays robots are working whether we like it or not. They should adapt these strange creatures into society's mainstream, and are asking some practical questions about robots—particularly about those used in industry, Brown said.

In giving background on what a robot can do, he said much of the work assigned to robots is considered too dangerous for human workers.

3-D jobs

The "3-D" jobs, those that are dirty, dangerous or difficult, not to mention the ones that are dull or dehumanizing, are often given to the robots, Brown said.

Robots can spot-weld, die cast, work with extremely high temperature metals, and spray paint in a room filled with toxic fumes, he said.

In his research, Brown said he found that "robots

can be taught to operate machines, freeing humans for safer and more pleasant jobs."

Moreover, robots can even serve refreshments to visitors or transport heavy, awkward machinery when programmed to do so, he said.

He said robots will soon be building locomotives for General Electric.

Will the robot displace the worker? The answer is yes, and no, according to Bates.

Eventually more robots will fill the factory lines but this will not happen for a number of years, he said.

The Monthly Labor Review (9/82) reports the work force at 100 million, with well below 10,000 robots being sold annually. At that rate, a major displacement of workers will not be felt for quite some time, Bates said.

Industry

Also, a 1980 American Society of Manufacturing Engineers Survey predicts "robots will replace 20 percent of the auto industry jobs by 1985, and by 1995, 50 percent of auto assembly will be done by automated machines."

However, the survey also shows that despite the staggering total of 440,000 workers likely to be replaced by 1990, all but five percent of those displaced will be "retrained rather than dismissed."

They will be "retrained rather than dismissed."

Isaac Asimov, veteran robotist, writes in "The Future" that "we must learn to live with robots to replace a human, but the jobs involved are beneath the dignity of a human. Better and more human jobs can be found for human beings and should be."

Joseph Engelberger, president of Unimation, Inc., said, "They (robots) will never replace the broad range of intelligence and sensitivity we call human. They will always be limited to factory

assembly or dispensing fast foods."

Considering what the future holds for the robots, Brown said the robot may be perceived as more of a friend than an adversary because of its growing place in the home.

Snow shovels

Engelberger envisions robots even being sent out to shovel snow.

"Keeping the shelves stocked with food and other items could be done by the robot's computer in direct communication with a supermarket," Engelberger added.

If the rest of the household wanted to cook an exotic dish, she could take the recipe to the robot and it would gather the ingredients," he said.

According to Leland Teschler, "New generations of robots will not be all installed in factories. Innovative home robots have already started toddling into living rooms across the country."

"They can walk, talk, avoid obstacles and even recognize a few spoken phrases," Teschler said.

Engelberger said, "In short, robotics will contribute importantly to the material well-being of mankind, without painful dislocation of individual workers."

"If 50 years from now the work week is three days, the air and water are clean again, and the industrial life is ever so desirable, we shall be at least partially beholden to robotics," he added.

Successor to Cloward appointed

BYU Support Services Vice President Fred A. Schwendiman has appointed Samuel Brooks Jr. to succeed Wells P. Cloward as director of BYU Food Services.

Brooks will move into the position when Cloward and his wife Myrtle, who serves as an assistant to the director, retire on Sept. 1, Schwendiman said. The Clowards will have served the university for 25 years.

BYU Food Services is one of the largest operations of its kind in the nation, serving some 40,000-45,000 campus customers per day.

Brooks, a native of Salt Lake City, has been with the university's Food Services since 1976.

David Schroeder, a sophomore from Hartford, Conn., received the Military History Award; Steven M. Johnson, a sophomore from Springfield, Neb.; and Brian Hemmett, a junior from Miami, received the Top Cadet in Academics Award.

The Defense Preparedness Association Award went to Don McClellan, a junior from Mesa, Ariz.

The Military Order of World War II was awarded to Mark Mattos, a junior from Alpine.

DR. MARVIN H. FOLSOM

DR. L. GARY LAMBERT

DR. MELVIN J. LUTHY

DR. DENNIS J. PACKARD

New department chairmen named

Richard H. Crocroft, dean of Humanities at BYU, announced the appointment of department chairmen, all to one-year terms beginning

Dr. Marvin H. Folsom in Germanic and Slavic Languages; Dr. L. Gary Lambert in Psychology; and Dr. Melvin J. Luthy in the Department of Linguistics and Dr. Dennis J. Packard in the English Department.

Outgoing department chairmen are Dr. Hans Kelling, Germanic and Slavic Languages; Dr. Paul Baird, French and Italian; and Dr. Carter, philosophy, both

returning to full-time teaching and research.

Crocroft also announced the reappointment of Dr. John B. Harris to a second two-year term as chairman of the English Department.

Folsom, a native of Vancouver, British Columbia, joined the BYU faculty in 1961 and currently holds the rank of professor of German and linguistics. He holds bachelor's and master's degrees from BYU and a doctorate in Germanic linguistics from Indiana University.

Baird, a native of Logan, joined the faculty in 1969 and is an associate professor of French. He holds a bachelor's degree from the University of California at Berkeley, a master's degree from University of California Santa Barbara and a doctorate in French literature from Rice University.

Luthy, a native of Logan, joined the faculty in 1971 and is a professor of linguistics. He is a graduate of Utah State University and holds a doctoral degree in linguistics from Indiana University.

Packard, a native of Culver City, Calif., joined the faculty in 1974 and is an associate professor of philosophy. He holds bachelor's and doctoral degrees in philosophy from Stanford University.

The BYU faculty in 1971 and is a professor of linguistics. He is a graduate of Utah State University and holds a doctoral degree in linguistics from Indiana University.

"We want students to be aware that whatever role they may select in the business world, they will be expected to help solve marketing problems."

"The class will be offered to advanced students in advertising, public relations, sales, marketing and business management."

"We want to give students an organized insight into a responsibility shared by all these professions," said Bert Lynn, instructor of the course and retired vice president of advertising and sales promotions for Western Airlines.

The course will focus on practical ways to recognize, analyze and solve

the "real-world" marketing problems.

"We want students to be aware that whatever role they may select in the business world, they will be expected to help solve marketing problems."

"The class will be offered to advanced students in advertising, public relations, sales, marketing and business management."

"We want to give students an organized insight into a responsibility shared by all these professions," said Bert Lynn, instructor of the course and retired vice president of advertising and sales promotions for Western Airlines.

This will be the second time this class has been offered at BYU. Interested students should enroll in Comm. 495R section 30 for fall semester.

Borrow for Less at Universal Campus Federal Credit Union

Your Universal Campus Federal Credit Union is not in the business of lending money to make profits. Your UCCU exists only to benefit members.

That's why a loan from UCCU can usually beat anything else available... especially when you consider the whole loan package, including insurance and any extras.

Plus, when shopping for a new car, a UCCU Loan can give you the extra leverage of dealing with cash.

Right now, you can borrow at the lowest rates in a long time with a Variable Rate Loan. And, your Variable Rate Loan is open-ended... so, you can add to it

anytime, up to your credit limit, without filling out new loan applications.

One thing your UCCU wants you to keep in mind is this... never borrow more money than you can afford and never borrow without a worthwhile purpose.

But, when you need to borrow money, borrow from your own co-operative financial family... people who make your needs the number one priority in lending.

Always borrow from your Universal Campus Federal Credit Union.
